If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: COMPUTER-DRIVEN INFORMATION MANAGEMENT SYSTEM FOR SELECTIVELY MATCHING CREDIT APPLICATIONS WITH MONEY LENDERS THROUGH A GLOBAL COMMUNICATION NETWORK
 Inventors (please provide full names): DAVID A. SINCLAIR

Earliest Priority Filing Date: 11/09/98 NEED BY 3/27/2000

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

THIS SEARCH IS TO UPDATE A SEARCH CONDUCTED ON 1/19/2000 BY GINGER D. ROBERTS IN RESPONSE TO THE ATTACHED AMENDMENT.

KEY CONCEPT:

The key concept to search is "the filtering of the passage of applicant data through the system to the lender" as discussed in the attached amendment. (see attorney's comments for key operational distinctions)

SOME SUGGESTED SEARCH TERMS:

Data Filtering, Data Criteria matching or filtering,
 LOAN DATA, matching, mining, collection or synchronizing
 Dynamic data filtering

HomeCom Reports Record Bookings in March.

Business Wire, p04061507

April 6, 1998

TEXT:

ATLANTA--(BUSINESS WIRE)--April 6, 1998--

New Internet Application Development Contracts for Second Quarter and Strong Growth in HostAmerica(tm) Viewed as Very Encouraging

HomeCom Communications, Inc. (NASDAQ SmallCap: HCOM), a provider of innovative and secure Internet software solutions for complex financial business applications, today announced record bookings for Internet application development and a record month for new HostAmerica (Internet hosting) accounts in March.

According to Harvey Sax, CEO of HomeCom, "March was a record month for HomeCom. Not only did our security services division land its largest contract award to date, but also our Web application development business closed more new accounts in March alone than it did in the entire previous quarter. In addition, our Internet hosting division, HostAmerica, opened a record number of new hosting accounts. These advances are in addition to the increasing revenue from hosting the Time Warner Road Runner cable modem offering previously announced. In total, HomeCom now hosts over 10,000 web sites."

"Although revenue from this activity will not occur until second quarter," Sax continued, "this confirms that we are on the right track as a company and that the focus on establishing our sales momentum in the financial services sector is beginning to pay dividends. We are on plan for profitability later this year, and will report a lower loss in the first quarter compared to the previous one. All this portends well for steady manageable growth in 1998. Real progress is being made although there remains many challenges ahead, including balancing the goal of profitability with the continuing need to invest in product development. I remain highly confident that we will be successful."

HomeCom received new contract awards in March from Munich Re, AIG, Summit Bank, FiServ and Amoco among others. In addition the Company believes it will receive additional follow up work from several of its existing clients, providing for continued revenue growth as it moves into the second quarter.

"Part of the reason for the increased orders is that we have made customer satisfaction our primary objective," said Sax, "and it is gratifying to see our customers talking to us about significant new projects in some cases as soon as the original project nears completion. This is important because I believe the financial services industry - our target market - is entering a phase of hyper competition. Technology and particularly Internet based solutions will be the primary competitive advantage and differentiation for many of the winners. We view these customers and this business as an annuity business. If we do our job well, the contracts never end, they just go onto the next phase or next project," noted Sax.

On the product front, HomeCom's Personal Internet Banker(tm) (PIB), a feature-rich Internet based banking solution, has been ported to the Microsoft Internet Finance Server Toolkit (MIFST), making it one of the first Internet based banking solutions to do so. PIB is completely OFX (Open Financial Exchange) compliant, supporting Microsoft's Money and Intuit's Quicken products, a key factor as banks and other financial institutions begin to actively support secure electronic commerce over the Internet.

PIB is one of HomeCom's entire family of Internet banking and financial products. Other products include:

-- OneStep - the first step in Internet Banking. OneStep quickly and easily allows Banks, Thrifts, and Credit Unions to establish a first class web presence. Within two hours of receiving the necessary information from the institution, the web site is live.

-- Harvey - the intelligent rule set for dynamic data mining. Harvey allows financial institutions to profile end-users on the fly, thereby accurately targeting specific products and services to the correct audience.

"On the acquisition front it should be noted that our acquisition strategy has been put on hold as our recent stock performance makes it difficult to acquire companies," noted Sax. "Nearly every company we speak to has higher private valuations than HomeCom, and would therefore be dilutive to shareholders for us to pursue. Until such a time as we have a higher stock price, any significant acquisitions are on hold. We continue to explore all options to create shareholder value, though, including divestiture of some business lines and outside strategic investment."

On an unrelated matter, it was reported in the Dow Jones Wire service that David Blech, an early investor in the Company, had pleaded guilty to purchasing shares of several publicly traded companies, including HomeCom and subsequently failing to pay for them thereby resulting in losses to certain brokerage firms. According to Sax, "For the record, HomeCom had no involvement in these trades or knowledge of them. The fact is that we are a public company and have no control over any individual or other entity that buys or sells our stock. This is our official and final comment on this issue."

HomeCom is an Internet applications company specializing in solutions for the financial services market. Headquartered in Atlanta, HomeCom also has offices in New York, and in Washington, DC, where its security services division is located. HostAmerica, a division of HomeCom, provides Internet hosting services for over 10,000 web sites in 45 countries worldwide. HostAmerica is a trademark of HomeCom Communications, Inc.

Journal Announcement: 9705W3

Abstract: To construct complete systems on silicon, application specific DSP accelerators are needed to speed up the execution of high throughput DSP algorithms. In this paper, a methodology is presented to synthesize high throughput DSP functions into accelerator processors containing a datapath of highly pipelined, bit-parallel hardware units. Emphasis will be put on the definition of a controller architecture that allows efficient run-time schedules of these DSP algorithms on such highly pipelined data paths. The methodology will be illustrated by means of an image encoding filter bank. (Author abstract) 26 Refs.

Abstract: We present a new method for designing a transversal filter bank for parallel processing echo data in real-time active acoustic imaging. The method is based on a discretized linear spatio-temporal formulation of an imaging system which uses transmitter arrays with coded-excitation. The filter coefficients are derived from a pseudo-inverse operator which not only decouples echoes from different image lines, but also provides pulse compression along the range direction. The new method,

together with the proposed coded-excitation imaging modality, may find many applications in SONAR, NDE and biomedical imaging areas. (Author abstract) 9 Refs.

Abstract: We report on the status of our high frequency data archiving project of global financial market data. The aim of the project is to build up a hardware and software environment which allows the **real time collection** and archiving of tick-by-tick **data** of all major **financial** markets. The system is now fully operational for 355 financial time series including those from the FX spot market, forward rates, deposit rates, currency and deposit fixings, currency indices, treasury market yields, and FX cross rates. The currencies involved include the G10 countries, Switzerland, the European Community, Hongkong, Australia, and the gold and silver markets. (Author abstract) 8 Refs.

Treatment: Theoretical (T)

Abstract: An optimal transversal **filter bank** for parallel processing of echo **data** in 3-D **real-time** acoustical imaging is proposed. It is based on discretized linear time-domain formation of the imaging equation for systems that use either coded-aperture transducers or transmitter arrays with coded-excitation. The two approaches are mathematically equivalent and result in an imaging system architecture which is based on parallel processing of a sampled vector of echo data with a bank of transversal filters. The filter coefficients are obtained through a

pseudoinverse operator which is designed to decouple echoes received from different image lines. (15 Refs)

Title: Direct measurements of secondary currents in a meandering sand-bed river

Author(s): Thorne, C.R.; Zevenbergen, L.W.; Pitlick, J.C.; Rais, S.; Bradley, J.B.; Julien, P.Y.

Author Affiliation: Dept. of Geogr. & Earth Sci., London Univ., UK

Journal: Nature vol.315, no.6022 p.746-7

Publication Date: 27 June 1985 Country of Publication: UK

CODEN: NATUAS ISSN: 0028-0836

U.S. Copyright Clearance Center Code: 0028-0836/85\$1.00+\$0.10

Language: English Document Type: Journal Paper (JP)

Treatment: Experimental (X)

Abstract: Natural channels often adopt a meandering course. Water flow in meander bends is three-dimensional, consisting of primary velocities which are tangential to the bend, and secondary velocities, which are in the radial plane. The pattern of secondary flow strongly affects the distribution of primary velocities. This in turn effects the distribution of erosion and deposition in the bend and the way in which the channel shifts and changes shape. Measurements of primary and secondary flows in a meandering gravel-bed river show that, in addition to the widely recognized main secondary circulation driving surface water outwards and bed water inwards, there can be a small cell of **reverse** rotation at the outer bank. Further **data** have been **collected** in a sand-bedded river at low,

intermediate and high discharges. The results confirm the existence of the main and outer bank cells but also indicate that in some bends the main cell does not extend to the inner bank. (13 Refs)

This volume discusses the computer work done to support the studies reported in the other volumes of the series. Data files, data file maintenance programs, and mine planning simulation models developed during Phase I are described in this volume. The simulation models were designed specifically for planning unit operations within the mining complex, and for providing general information to use in developing macro models. The model descriptions are in the form of 'User's Manuals.' The models cover the following unit operations: land clearing; drilling and blasting; area stripping with draglines; coal loading with shovels and front-end loaders; coal hauling with off-highway trucks; and hauling with belt conveyors. The data files were set up to support the model development effort. These files include information on geology; geography; coal resources and reserves; mining equipment; population statistics; weather statistics; and industry financial statistics. The geology, geography, and resource and reserve files cover only regions of interest for large-scale surface coal mining. The data file discussions illustrate the data content but do not include detailed descriptions of file structures. Example listings of data from the files are included. This document does not include copies of the data files, and it does not cover case studies made with the models. The data files and case studies will be published in separate research reports, as appropriate. (ERA citation 01:019571)

ISA Document Number in Printed Publication: 9707175

Beyond the back of the book. Indexing in a shrinking world.

Document Type: Journal Article

Author (Affiliation): Fillmore, L.

Journal: Key Words

Publication Language(s): English

Source: Vol. 3 Issue 3 p. 16-20 Jul-Aug 1995

New directions for indexers in an increasingly electronic age are examined. The blurring of the borders of the HMI (human-machine interface) has contributed to mediocre indexes in the past decade, starting with computer books and manuals and leading up to today's Internet search engines. It is argued that skilled indexers need little experience with the World Wide Web in order to earn substantial amounts of **money** as custom **filters** of vast amount of available **information**. In the **dynamic** environment of the WWW, indexers are asked not only to read both analytically and synthetically, to both take apart and put together again, but also to serve as "link editors," associative thinkers in a recorded environment, with the power to name links, to identify the reasoning that drives the associative thought behind their links. Without this kind of effort, the transition of skills from paper to online, the business of associative thought, sits at the center of the commercial online publishing business, and cannot be accurately assessed, transferred, or built upon unless it is used and understood.

INTERNATIONAL PATENT CLASS: **G06F-017/30**

...ABSTRACT interactive decision points; customized insertion of
advertisements; simultaneous traversal of multiple hyperpaths; collection
of and **dynamic** modification of a tour based on **collected** route
information and/or touring statistics.

...SPECIFICATION among multiple Web sites; and even more particularly, to
an intelligent Web browsing system that **dynamically** adapts a tour based
on **collected** route **information** . touring statistics, or similarity to
one or more like-minded users.

What is a web...customizable tour mechanism can be used to facilitate
customization in E-commerce. A carefully designed **dynamic** tour can
collect valuable customer **information** . This is a far better way to

collect customer information as compared to asking customers...in the art that whether the set of tokens associated with a Web object is **dynamically** generated on the fly through a **data mining** technique or statically associated with a Web object is an implementation issue. Furthermore, it should...customization in electronic commerce (E-commerce) (Figure 20). A Web site can add carefully designed **dynamic** customizable tours to **collect** valuable customer **information**. This is a far better way to collect customer information as compared to asking customers...

...CLAIMS providing interactivity points including one or more of tour navigation options and recommendations for the **dynamic** objects, based on preference **information** ;
collecting and analyzing viewer navigation route **information** during the tour; and
dynamically adapting said tour navigation options and said recommendations based on collected navigation route information.

2...

...on-line commerce in a hypertext-based system, comprising the steps of:
providing a tour;
collecting customer **information** associated with a tour navigation;
and
dynamically customizing subsequent site accesses in the tour, based on the collected information.

20. The method...

Figures 16A-16C illustrate how a clock mechanism may...connected to an input pin instance 328 on a video decompressor filter 330. Video decompressor **filter** 330 will receive the **live** video **data** in compressed format and decompress it into a format acceptable to video rendering hardware. After...

...as represented by arrow 376. The audio hardware, under the control of the audio renderer **filter** 364, will render the digitized **data** samples into **real time** electronic signals that may be transmitted to and perceived from a speaker 378.

When creating...

Detailed Description

Claims

English Abstract

...communications services in conjunction with a communications network is disclosed. The method and apparatus includes **collecting information** in **real -time** concerning a transaction traversing the network (337) and storing the transaction information in a database...

Detailed Discription

... number-based long distance debit services.

Transaction Detail Records ("TDRs")

TDRs are defined as the **real -time collection** of network transaction **information** (e.g., network signaling messages, access/transport/exit routing information, network resource usage and consumption...

...Master SMS DB 330. Using data structures and methods known in the art, transaction processing **information** is **collected** in **real time** and stored in a standardized format in this database. Moreover, the transaction information may be...

...originating carrier, originating city; total connection time, and type of information transmitted (i.e., voice, **data** , video).

The **real -time collection** of **information** in TDRs allows for **real -time** analysis and acquisition of the information. ...call in progress and assess the route that call has traveled within the system. By **collecting** the above types of **information** in **real -time** as taught herein and analyzing it, one skilled in the art would be able to...

Claim

... enhanced communications services in conjunction with a 2 communications network, comprising the steps of 3 **collecting information** in **real -time** concerning a transaction traversing the 4 network; storing the transaction information in a database; and...

...a network for carrying transaction data; 4 an element manager coupled to the network for **collecting** , in **real -time** , **information** concerning the transaction as it traverses the network; 6 a database linked to the element...

REAL- TIME DOCUMENT COLLECTION SEARCH ENGINE WITH PHRASE INDEXING

Main International Patent Class: G06F-017/30 ;

Fulltext Availability:

Detailed Description

Detailed Discription

TI

Real -Time Document Collection Search Engine With Phrase Indexing
Cross-Reference to Related Applications The present application is
related...

...in particular, to an enhanced document search engine providing high
speed query response against a **real -time** updatable, potentially
distributed **document collection** .

DescrijAjon of the Related Art*

The volume and variety of informational content available on the...

Invention

Thus, a general purpose of the present invention is to provide a fast
response **document collection** search engine operative against **real -**
time updatable document indexes that can be distributed over some number
of collection index servers.

This...the present invention allows for and well supports the parallel
search of multiple and distributed **document collection** indexes. New
documents can be **dynamically** integrated into the searchable
collections through parallel extension of any search to include a **real -**
time updatable **document collection** index.

Still another advantage of the present invention is that significantly
time consuming operations related...

Detailed Discription

... the processor unit.

Power supplies and radio frequency or other wireless communications units allowing for **real -time data collection** by remote **data** processing systems are also available for belt transport and electrical interconnection to the processor unit...depict typical applications of device 10. In the configuration of Fig. 5, device 10 provides **real -time data collection** to a remote **application** processor.

In this instance audible input data processed by voice processor module 20 is received...

PRODUCT NAMES: SAS/Trader (372901); SAS/GIS (372919); JMP Design*
Software (370096)

TITLE: SAS unveils products, graphics support

AUTHOR: Anthes, Gary H.

SOURCE: Computerworld, v26 n17 p76(1) Apr 27, 1992

ISSN: 0010-4841

HOME PAGE: <http://www.computerworld.com>

RECORD TYPE: Review

REVIEW TYPE: Product Analysis

GRADE: Product Analysis, No Rating

Several new products are in various stages of development at SAS Institute. SAS/Trader, a **real-time financial data collection** system, and SAS/GIS, a geographic **information** system, were previewed at a trade show. However, neither product is expected to reach the market in less than two years. SAS says that it will support graphical computing environments with its desktop products, including OS/2 2.0, Windows 3.1, and UNIX. Also announced was JMP Design, an experiment design tool that functions as a companion to SAS's statistical visualization package.

FILED: April 10, 1998 (19980410)

INTL CLASS: H04N-017/00; G06F-017/40

ABSTRACT

PROBLEM TO BE SOLVED: To provide an apparatus and method by which **dynamic** and accurate user behavior **data** are efficiently **collected** by using a TV and a PC.

SOLUTION: This collection apparatus is provided with a...

... means 16 to the memory 24 in response thereto. Through this configuration, the viewing behavior **data collection** device **collects data dynamically** and accurately, without **collecting** many wasteful **data**, and the **collected data** can be analyzed later from various aspects.
